EuroFAANG Research Infrastructure Celebrates Successful Annual General Meeting in Brussels

Press release - 21 February 2024

The EuroFAANG Research Infrastructure (RI) project held its Annual Meeting in Brussels on 16 February 2024. Bringing together all seven partners in a hybrid format, the event showcased the results of the first year of the project.

The meeting commenced with a discussion focusing on the presentation of goals and milestones achieved during the inaugural year from each Work Package. Participants engaged in conversations, highlighting the progress made in various areas of concept development for the research infrastructure.

Three of the key highlights of the meeting were the successful submission of all deliverables expected for the year 2023, a summary of links explored with other RI projects, and discussions around the establishment of the European think-tank on genome editing in year one and next steps for this

The EuroFAANG RI Project consortium, comprised of research institutions and organizations, remains committed to global collaboration and facilitating advancements in the European research infrastructure space. The Annual General Meeting provided a platform for partners to share valuable insights, exchange ideas, and solidify plans for the upcoming second year of the EuroFAANG RI project.
